

BARCODE SCANNER

Programming the **LS1902-T & LS2208** for use with StarShip

These instructions are for the Symbol LS1902-T & LS2208 Barcode scanner
ONLY!

The following instructions will allow the user to scan a bar-coded Invoice\Order number into Starship and automatically “press” the Enter key. Repetitive keystrokes such as SAVE, DEFER, REPEAT, and NEXT can also be programmed. These repetitive keystrokes can be scanned using the preprinted Barcodes at the end of these instructions.

You must tell the scanner what kind of keyboard connection you are using by scanning the appropriate Barcode on the following page. Connect the scanner to the PC and Keyboard while the PC is on (see page 1-6 of the Online Manual for connection instructions). **IMPORTANT:** The keyboard will be disabled until you scan one of the Barcodes on the next page.

The “ENTER” command must be programmed before any of the other commands are entered. To program a command, “scan” each barcode in order on that page. If you do not hear a beep or series of beeps, the scanner did not read the barcode. Try scanning the barcode at different angles until you hear the beep(s). If you make a mistake, scan the last barcode on that page and start at the beginning of that page again. To reset the scanner back to Factory Defaults scan this barcode:

Set All Defaults

IBM PS/2

IBM AT

IBM AT NOTEBOOK

“ENTER” Command

1)

6)

2)

7)

3)

8)

4)

9)

5)

10)

Scan these barcodes **FIRST** in order 1 through 10. If you make a mistake just scan number 10 and start over at number 1. This command allows you to scan an Invoice/Order number with an “Enter” command at the end.

IMPORTANT: Do not program an “Enter” command into your Invoice\Order number Barcode.

SAVE

1)

7)

2)

8)

3)

9)

4)

10)

5)

11)

6)

Scan these barcodes in order 1 through 11. If you make a mistake, scan the last barcode and start again. The “SAVE” Barcode allows you to scan the “SAVE” command in without using the keyboard or mouse. The “SAVE” barcode can be found at the end of these instructions and should be posted in a convenient place

DEFER

1)

7)

2)

8)

3)

9)

4)

10)

5)

11)

6)

12)

Scan these barcodes in order 1 through 12. If you make a mistake, scan the last barcode and start again. The “DEFER” Barcode allows you to scan the Defer command without using the keyboard or mouse. The “DEFER” Barcode can be found on the last page of these instructions.

NEXT

1)

7)

2)

8)

3)

9)

4)

10)

5)

11)

6)

12)

Scan these barcodes in order 1 through 12. If you make a mistake, scan the last barcode and start again. The “NEXT” Barcode allows you to enter multiple packages without clicking on the Next button in Starship. The “NEXT” Barcode can be found on the last page of these instructions.

REPEAT

1)

2)

3)

4)

5)

6)

7)

8)

9)

10)

11)

12)

13)

Scan these barcodes in order 1 through 13. If you make a mistake, scan the last barcode and start over. The “REPEAT” barcode allows you to repeat the package “x” amount of times (x being the number of packages) The “REPEAT” barcode can be found on the last page of these instructions.
